

## On the Subject of Only Connect

Greek letters are too pretentious, so we use Egyptian hieroglyphs.

This module consists of two rounds.

### Round 1: Egyptian Hieroglyphs

- The module displays the six familiar Egyptian hieroglyphs in a  $3 \times 2$  arrangement, and a team name.
- Determine how many of the following criteria are met by each of the Egyptian hieroglyphs.
- Select the Egyptian hieroglyph that meets a number of criteria different from any other Egyptian hieroglyph.
- Criterion #1 is met if the Egyptian hieroglyph is in the specified location.
- Criterion #2 is met if the specified place in the serial number occurs in the team name. If the place is a digit, convert it to a letter (0=Z, 1=A, 2=B, ..., 9=I).
- Criterion #3 is met if the bomb has at least one of the specified port.

Criterion	Two Reeds	Lion	Twisted Flax	Horned Viper	Water	Eye of Horus
#1	top left	top middle	top right	bottom left	bottom middle	bottom right
#2	first	second	third	fourth	fifth	sixth
#3	PS/2	Parallel	RJ-45	Stereo RCA	Serial	DVI-D

## Round 2: Connecting Wall

- The module displays a jumbled-up grid of 9 letters.
  - Group the 9 letters into 3 groups of 3, such that each group contains letters from the same language. There is only one solution.
